

Gaming innovators and Ingenuity Cloud Services: the ideal team

Eliminate lag and level up gameplay with Ingenuity Cloud Services

Launching new games into the global marketplace requires a robust and expandable online infrastructure. Without this, latency is guaranteed to impact both the gamer's experience and your reputation.

The best tech on your side

Developers choose Ingenuity Cloud Services for our Intel Xeon CPUs, ultra-fast SSDs, and high-performing GPUs. We partner with industry-leading technology providers including NVIDIA and Nocton, ensuring optimum game play and application performance.

Keeping gamers close to the action

With more than 50 data centers located near to major internet exchanges, worldwide, we deliver gamer data with minimal delays, so players are keen to respawn, time after time. We eliminate latency with advanced routing for seamless, high-quality gameplay.

Delivering all the gaming data

Keeping players online with zero packet loss underpins a seamless gaming experience. We partner with over 30 of the world's largest peering and transit providers to ensure every bit of digital data is distributed to user consoles, computers, smartphones, and tablets.

Flexible billing

Don't let cost get in the way of a gaming success story. We offer flexible billing and rapid service provision, so top titles won't damage your bottom line.

"Switching to Ingenuity Cloud Services has helped us significantly reduce load times and greatly increase overall reliability."
